

June 8, 2007 at Gateway County Club, 6 P.M.

Present, Bob Sutherland, board representative, Bill Markle, Denny Whitworth

Topics for Discussion:

Password protection. The Board did not provide specifics on their requirement password protect the web site. The majority of web sites are password protected in order to collect information on the users as a condition for allowing access to the site. The committee voted to ask the Board for clarification on what data its wants to collect from the users as they register for a password. At a minimum we can obtain email addresses but there are other useful data which can be obtained. The committee also expressed interest in the practicality of cross referencing web site data with bar code data. Bill is working on a password protection system which would allow free access to some pages password restricted access to others. We can have a third tier of protection for certain administrative pages for use by Board members and perhaps committee chairpersons.

Board and Committee support. The site is a container waiting to be filled with content from the board and committee chair-people. Bob agreed to encourage board members and committee chairpersons to sent whatever content they wish to share with the community to webmaster.

Purchase domain name and web contents of Gatewaygreens.net The committee voted two to one to recommend to the Board they complete the purchase for the site for \$2,000. Bill is satisfied the gwgreens.org web pages can be transferred to the new domain name.

The committee agreed to seek new members.

The next meeting was not scheduled.
